## TRUSTEES' REPORT.

--:0:---

The president and board of village trustees, in this the last report to the taxpayers under the village government, respectfully submit a brief account of their stewardship ending with the village government on the last day of March, 1893. Starting out last spring to administer the duties of the village government under circumstances of a most embarrassing character, we nevertheless, as we believe, by careful and judicious consideration of the people's necessities, accomplished much during the year in the building, grading and curbing highways, laying sidewalks where most needed, laying sewers, building and improving Main street park, providing for the necessities of the fire department and in meeting outstanding obligations against the village. After deducting from the total amount of taxes raised last year, the various sums for street lighting, police, parks and other special appropriations, such as fire department, the construction of sidewalks, etc., etc., as voted by the people at the annual village meeting of 1892, the people can (if they have not already) see the situation in which your board of village officers were placed, from the very outset. It was not only a condition which confronted us, but a complicated theory not easy of solution.

We have no apology to make for our conduct of your affairs during the past year, but believing an explanation in order we submit this statement as a part of the general report to which we respectfully invite the careful consideration of every taxpayer within the borders of the old village organization.

Respectfully,

N. A. BAILEY, President.

EDWARD S. CURTIS, JAMES DOUGHERTY, HENRY HEYMAN, W. H. VALIQUETTE, EDWARD V. ROSS, A. D. SLACK, OWEN MONAHAN, JOHN W. BRISLIN, L. G. BAGLEY,

Trustees.

# TRUSTEES' ORDERS.

J. M. DAVIS, L. VALIQUETTE, Jr., Commissioners. W. C. LANDON,

Rutland, April 3, 1893.

## Chief Engineer's Report.

The undersigned, Chief Engineer of the fire department of the village of Rutland, agreeably to the provisions of section 4 of "An Ordinance Establishing a Fire Department," herewith submits his annual report of the property belonging to the department, the condition thereof, the losses by fire and causes thereof, the insurance thereon, "so far as may be ascertained," etc., as required by said ordinance.

Your apparatus for extinguishing fires consists of one hand engine, built by Cowing & Co., with hose cart; one second class steam fire engine, built by the Amoskeag Manufacturing Co., with hose cart; one hook and ladder truck, with ladders, hooks, etc.; five hose companies, as follows: J. W. Cramton Hose Co. No. 4, H. H. Baxter Hose Co. No. 5, J. A. Sheldon Hose Co. No. 6, J. D. Hanrahan Hose Co. No. 7, J. B. Reynolds Hose Co. No. 8. All the companies are fully manned and are commanded by efficient officers.

The department and telegraph fire-alarm system are in excellent condition. All the companies are well uniformed. We have a good supply of hose, 1,500 feet having been purchased in the past year. The J. B. Reynolds Hose Company No. 8 require 400 feet more; this would give them enough for a change—all other companies have a change. The fire-alarm system has been extended to ward 9 and one box placed therein, and one additional box placed in wards 2 and 8.

The department was called upon for aid from Castleton. As they were ready to start they were notified that the fire was under control and their services were not needed. There needs to be repairs made in some of the hose houses and some supplies to be bought, such as rub-

ber coats, hose pipes, etc. As we are about to adopt a city form of government and more territory will be added to our present village, it will be necessary to make several changes in the department and the fire-alarm service. No doubt but the city council will make all changes for the best interest of the city and the department.

I herewith present a statement of the village property in charge of each company, the location of hydrants, also location of the fire-alarm boxes and keys thereto, and a list of officers and members of each company.

#### CONCLUSION.

In closing my report of the fire department I desire to return my thanks to the president and all village officials with whom I have had official dealings for their kind and courteous attention. To the officers and members of the department I wish to express my thanks for their prompt attention to duty, and I have to say by way of encouragement that the high standard of efficiency heretofore reached by the members of the department has been maintained.

Respectfully,

K. K. HANNUM, Chief Engineer.

Rutland, March 28, 1893.

### RUTLAND FIRE DEPARTMENT.

#### RUNNING CARD.

Companies will answer calls from boxes as follows:

No. 
$$7..14-19-37-42-43-45-47-53-61-63$$
.

Hook and Ladder Company will answer all calls

#### GENERAL ALARM.

The General Alarm will be ten blows given on the Bell in quick succession, followed by repeating the Box Call, the same to be given by the Whistle. When this alarm is given after the first call, the WHOLE DEPARTMENT will respond.

#### RELEASE SIGNAL.

After an alarm, three blows on the Bell followed by three blasts of the Whistle, will indicate that the fire is out or under control, and no more assistance will be needed.

When an alarm is given all members of the different Companies will go to their houses the same as if their box was called, and there wait until the release signal is given.

# Village Attorney's Report.

VILLAGE ATTORNEY'S OFFICE, March 28th, 1893.

To the Taxpayers of the Village of Rutland:

In matters of litigation, the past year in many respects has been a remarkably fortunate one, and in the main, in the courts, an uneventful one.

No new cases have been brought either by or against the village, nor none now pending, other than those reported by your attorney in the last annual report, to which reference may be had.

The village did, however, during the last year, bring suit against Dr. Marstin, charging him with a breach of village ordinances governing the action and defining the duties of physicians and others in case of knowledge or care of contagious diseases, the burial of the dead, etc. In this case, which, as disclosed by the evidence, the jury were evidently moved by sympathy, and presumably assumed that a good lesson had been taught by the arraignment of the doctor for the irregularities complained of, and inasmuch as the costs were of a nominal character, it would be no material hardship or detriment to the village to assume them.

The suit viz.: Walters vs. Morse and trustees is a County Court suit, in which the village is only interested as trustee. In this suit, I have made the necessary disclosure in behalf of the village and the same is on file. The cases reported in my last annual communication, by which parties north of the village seek to recover from the village for, as they claim, the destruction of valuable water power in consequence of its use by the village, are still in court, a commission having been appointed, though no definite action taken to date necessitating an extended report by your attorney.

I desire in conclusion to say that the claim of William Ryan against the village, and to which I directed your attention in my last report, has been satisfactorily adjusted by the trustees in accordance with the directions of the people at the last annual meeting. The amount paid in settlement of the same was \$275, which was a good settlement for the village. Many small claims were preferred against the village by resident real estate owners during the last year, resulting from overflow of sewers and various other causes in times of heavy rains, all of which were given careful consideration, from a legal standpoint, and in no instance has the village, in this class of cases, suffered material loss. I have during my entire term of office, covering a period of three years, watched your interests with scrupulous caution, and in making this, my last annual report for the village government as your attorney, I can and do with a just measure of pride sav. that I fail to recall an instance during my three terms of office as the legal adviser of your trustees, when the taxpayers suffered loss or damage in consequence of hasty or immature consideration of every legal matter submitted to the judgment of your attorney.

JOHN D. SPELLMAN,
Village Attorney.
